PROFESSIONAL SUMMARY

Full Stack Software Developer with experience in high-demand systems (**1M+ subscribers**) using **Vue.js, Node.js, TypeScript, Java, Spring Boot** and **PostgreSQL**. Focused on permission architecture (**RBAC**), REST APIs, automated testing and code quality within agile methodologies. **UCaldas Hackathon winner**.

EDUCATION

Corporación Universitaria Iberoamericana — Bogotá, CO
B.S. in Software Engineering [Undergraduate] — *Feb 2024 – Dec 2027*

Certifications and Additional Training

Generative Artificial Intelligence – AWS — *2026*
Web Development — Platzi — *2023*
Multimedia Production [Technologist] — SENA — *2022*
Web Application Development [Diploma] — Universidad de Caldas — *2021*

EXPERIENCE

SeatMe — Coworking Desk Booking System — Personal project
Full Stack Developer (sole author) — Capstone project, Software Engineering — *Aug 2026 – Oct 2026*

- Designed the architecture and built end to end a time-slot **desk booking system** with **Vue 3**, **TypeScript**, **Node.js** (Express 5), **Prisma** and **PostgreSQL** (Supabase), deployed on **Vercel** and **Render**.
- Modeled the booking state flow (pending, confirmed, checked-in, completed or cancelled) with business rules: schedule overlap, desk availability and user permissions.
- Implemented **JWT** authentication with role middleware (ADMIN/USER), **bcrypt** password hashing and **Zod** validation, plus an admin panel with CRUD for zones, desks, amenities and bookings.
- Wrote **21 unit tests** with **Vitest** for the zone, desk and booking services, covering happy and sad paths.

PromoValle S.A.S E.S.P — Bogotá, CO
Software Developer — *Mar 2025 – Jun 2025*

- Developed and maintained modules of the **utility billing system** for **1M+ subscribers** across multiple Colombian cities, using **Vue.js**, **Node.js** and **PostgreSQL**.
- Optimized critical **SQL queries** in PostgreSQL, cutting execution times by **~10%** and fixing billing inconsistencies affecting thousands of accounts, working directly with business stakeholders.
- Implemented **predictive maintenance alerts** and inventory management in the vehicle fleet system (**Laravel**, Vue.js, PostgreSQL), replacing manual Excel processes.
- Redesigned the **RBAC** permissions module in PostgreSQL, removing **3 critical** access **vulnerabilities** and reducing security audit time by **15%** for 40+ users.
- Completed **6 Scrum sprints** with **8 developers**, integrating **CI/CD** and taking part in **code reviews** with senior engineers.

Colombian TI Software S.A.S. — Bogotá, CO
Java Developer — Educational Platform (Collaborative Project) — *Aug 2022 – Aug 2024*

- Designed and built from scratch backend modules with **Java** and **Spring Boot** for an educational platform with **10,000+ users**, implementing subscription, permission and academic management with **JPA**.
- Implemented an onboarding interface with **Java Swing** (**MVC**) that cut registration time from **5 to 3 min** per user, improving the experience of 10,000+ users by **~40%**.
- Designed the **REST API** and conversational flows of a **WhatsApp chatbot** in **Spring Boot**, reducing support tickets by **~30%**.

ACHIEVEMENTS

UCaldas Hackathon — Winner (1st Place) — November 2021
36 hours | *Team of 4* | *Role: Technical Lead*

- Led a team of **4 developers** among **8 teams**, delivering in **36 hours** a **100% functional** prototype for access to health, food and safety services.
- Built the solution with **C#** and **Azure**: authentication with differentiated profiles, **RBAC** and a relational database.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, PL/SQL

Frontend: Vue.js, Pinia, PrimeVue, Tailwind CSS, Bootstrap | **Backend:** Node.js, Express, Spring Boot, Laravel, Prisma, JPA

Databases: PostgreSQL, MySQL, Supabase | **Tools / Cloud:** Git/GitHub, Vitest, CI/CD, Docker, Vercel, Render, Azure

Methodologies: Scrum/Agile, Code Reviews, Clean Code, Testing | **Soft Skills:** Technical leadership, teamwork

Spoken Languages: Spanish (native), English (intermediate) | **Interests:** Microservices architecture, DB optimization, generative AI
